

AHD Dome Camera with IR & Audio

AHD-DOME95

Enhance the safety of your commercial vehicle, truck or bus with our AHD-DOME95 Heavy Duty Dome Camera. This robust camera delivers high-definition 1080p AHD resolution for clear, detailed views of your vehicle's interior. The CMOS sensor provides excellent image quality, ensuring that even in low-light conditions, you can see with clarity. With a 95-degree viewing angle, this camera covers a slightly narrower area than most, eliminating the distorted image that most wide angle cameras produce.

Night vision is supported by 12 infrared LEDs, allowing visibility up to 8 meters in complete darkness, while the built-in microphone captures audio, providing a comprehensive sense of your environment. The camera's automatic features, such as gain control, white balance, and backlight compensation, work together to maintain optimal image quality in various lighting conditions.

Designed to be durable and reliable, the camera includes a fixed 0.5 meter cable and a 4Pin Aviation style plug for easy installation [many extension cables available, from 6m to 20m]. Operating on a 12vDC power supply, it's a perfect fit for the electrical systems of most commercial vehicles.

Specifications

Camera resolution: 1080p AHD
Sensor type: 1/2.9" CMOS
View Angle: 95°
Distance guide lines: No
Min Illumination: 0 Lux
Infrared LEDs: Yes, 12
Night vision distance: 8m
Microphone: Yes

Automatic Gain Control
Automatic White Balance
Automatic Backlight Compensation
Automatic Shutter: Auto - 1/50 ~ 1/50,000 sec
Cable included: Fixed ~0.5m
Plug type: 4Pin
Water Resistant: No - Internal use only
Power: 12vDC
