

PRODUCT CODE: AHD-FFW

BARCODE: 9332820009569

DESCRIPTION: AHD Windscreen Mount Forward Facing Camera

No longer do you need to try to adapt a rear camera to the front of a vehicle. Our AHD-FFW is specifically designed for this purpose. At Full HD 1080p resolution, the AHD-FFW is designed for use with HD multi-channel drive recorders like the Nesa DVR-4000HDQ* for recording in Full HD. This is also fully compatible with the Nesa NSM-7300AHD* Full HD monitor. The AHD-FFW features an all glass lens with an aperture of f2.0 for high performance in low light, a Sony CMOS sensor with wide dynamic range and anti-flicker and a wide view angle of 120° to cover the entire front view from the vehicle.

The rear view mirror surround mount gives the installed unit an OEM look** but can also be mounted with just the camera without the surround (though it is more secure with the surround installed). A 3 meter cable with CB/Aircraft style 4 pin connector is included to connect directly to the DVR-4000HDQ or NSM-7300AHD. Note, this camera does not have a microphone for audio.

SPECIFICATIONS:

For AHD monitor or AHD DVR only*	Lens vertical adjustment of 50°
Full HD 1080p @ 25fps	OEM look rear view mirror mount surround**
Sony CMOS sensor	Working temp: -10°C~+60°C
Glass lens with f2.0 aperture & anti-glare	Power: 12v DC
Wide dynamic range & anti-flicker	Includes: Mirror surround mount/wire housing, double sided tape, 3 meter cable
Wide angle 120°	

*Camera had been fully tested with both monitor and drive recorder mentioned. We cannot guarantee compatibility with other AHD monitors or drive recorders from other manufacturers

**Mirror mounting bracket must be temporarily removed to mount the wire housing/surround
