Forward Facing 1080p Camera w/Microphone

AHD-FFWC

No longer do you need to try to adapt a rear camera to the front of a vehicle. Our AHD-FFWC is specifically designed for this purpose. At Full HD 1080p resolution, the AHD-FFWC is designed for use with HD multi-channel drive recorders like the Nesa DVR-4200HD for recording in Full HD with audio from the internal microphone. The AHD-FFWC features an all glass lens with an aperture of f2.8 for high performance in low light, a CMOS sensor with wide dynamic range and anti-flicker and a wide view angle of 130° to cover the entire front view from the vehicle. The camera has a 70° adjustable tilt to match the angle of the windscreen.

Supplied with a 4 meter cable with 4 pin connector.
