

WAYLENS™

PRODUCT CODE: CDV-Horizon

BARCODE: 9332820008975

DESCRIPTION: Waylens Horizon Performance Dash Cam OBD/WiFi/BT

The Waylens Horizon is no ordinary dash cam. The Horizon is a state-of-the-art vehicle performance logger, lap timer and premium video camera for driver and engine performance analysis for automotive, 4WD and motorsport enthusiasts.

Captured by the included Bluetooth OBD-II transmitter, data such as speed, RPM and boost pressure are all recorded as a data file and is overlaid on to the 1080p, 60fps video. The Waylens Horizon also records GPS position, G-force and pitch/roll from sensors within the unit. Want to see who has the fastest 0-100km/h time? Download the Waylens smartphone app and compare your times with your friends and others around the world. WiFi enabled, the video footage can be displayed and fully edited on your phone, as well as share directly to YouTube or the Waylens community. Using the included dock, transfer the video and data files to your PC or Mac for even more editing capabilities with the Waylens software.

Please note: The Waylens Horizon does not include a memory card. Data writing speeds are as high as 38Mbps and therefore require high speed cards. To avoid or reduce the occurrence of "Card Errors", we only recommend using high endurance MLC class 10 cards - San Disk High Endurance, Transcend High Endurance or Lexar High Endurance.

SPECIFICATIONS:

7 element aspherical glass lens	Wifi 802.11 b/g/n, Bluetooth 2.1 & 4.0
Large 1/1.8" sensor	Rechargeable lithium-ion battery
Video/frame rate: 1080p/60, 1080p/30, 720p/60 and slow motion 720p/120	Three-axis accelerometer & gyro
Wide angle lens: 157°	Steering wheel remote to save videos
1.39" Circular AMOLED display	Includes: Mount, OBDII transmitter, steering wheel remote, dock, power & USB cables. No memory card included.
MicroSD card up to 128Gb (not included)	

DATE OF RELEASE: July 2017
