

**PRODUCT CODE: CMD-Dual**

**BARCODE: 9332820005240**

**PRODUCT DESCRIPTION: CMD Dual Mount 170° Micro Camera with Parking Assist Lines and Mirror image options**

The new updated CMD-Dual is a versatile camera offering a choice of mounting and display options. Install with a bracket mount or flush mount simply by swapping the head. The flush mount head can easily be painted to match the bumper for an OEM look. The Micro-connector is an installers dream as it allows the cable to be routed through small openings and grommets. The CMD-Dual also has built-in park assist lines which are visible on any monitor/screen. The park assist lines can be enabled/disabled by simply connecting or disconnecting two wires. Mirror/Normal image options are now available by also connecting two wires. So now you can customise the installation by possibly adding a switch to turn the park assist lines or mirror image on and off (switch not supplied).

CMD cameras offer a better image quality than CMOS cameras whilst remaining cheaper than CCD cameras, with its quality very close to that of the CCD's.
