

PRODUCT DESCRIPTION: Universal Trailer Curly Cable Cord

NARRATIVE

Each end is fitted with a DIN cable - the vehicle end has 20m DIN/RCA and power/earth, the trailer end has 6m DIN which will connect to either an ECC series camera or you can use the supplied adaptor which gives you RCA and DC power out to use any 12v camera. 020DIN (20m) & 282DIN (6m) extension cables will also suit the connector at this end allowing for a neat extension for any camera system.

The connectors also have 2 spare pins as well as the wired 5 pins so you can run a few extra cameras through them. All 7 pins are accessible at each end allowing for a customised solution, including removing the 6m din cable if required.
