

dashmate®

1080P FHD Dual Channel
Dash Camera with 3.0" OLED
Touch Screen, WIFI & GPS

Experience the latest in Dash Camera Technology.

Experience OLED screen technology for the first time in a Dash Camera and enjoy added peace of mind with our Dual Full High Definition Cameras in our DSH-1052.

Our Wide Dynamic Range sensor automatically adjusts the light and dark areas of the image, increasing image contrast and picture detail, delivering sharp images in both Day or Night, Rain or Shine.

Sharp Image Quality Simultaneous front & rear recording

Experience the ultimate in-screen performance with our OLED display. Featuring bright vivid colours and optimal viewing from almost any angle and every situation.

TECHNOLOGY DRIVEN™

Powerful technology to keep you safe on the road

Full HD Resolution

Capture your trip in Full High Definition 1080p recording all details on the road.

150° FOV

Ultra-Wide angle lens provides greater area coverage and protection.

3.0" OLED Touch Screen

Easily navigate menus, adjust settings and view footage using the in-built touch screen.

Wide Dynamic Range

WDR brightens the dark areas of a image, increasing contrast and picture detail.

Lane Departure Warning

Alerts you if you are moving away from the designated lane while driving.

Real Time Alerts

Real time on-screen alerts for Fixed Speed Camera, School zones and more.

In-built WIFI & GPS

Access footage on your smartphone via WiFi. The GPS will record your speed and position as you drive.

Rear/Reverse Camera

Provides a simultaneous recording from behind your vehicle and gridlines on screen when reversing.
