

dashmate®

Full HD Dual Channel Discreet Barrel DVR with GPS & WIFI

Key Features

Full High Definition

Front and Rear camera both record your footage in fine detail up to FHD 1080P video.

130° FOV

Wide angle field of view helps capture more of the road.

Discreet Barrel Cam

Allows the camera to be hidden behind your rear view mirror.

Rear Facing Full HD Camera

Features a High Performance sensor for enhanced image quality in low light and night time conditions.

GPS Logger

Records your path and speed which can then be mapped out alongside your footage with the included software.

Motion Detection

Will stop the dash camera from recording when no motion is detected and immediately restart once motion is detected.

3D G-Sensor

Automatically saves your footage when the sensor is triggered by an incident.

WIFI

Enables easy playback and transfer of footage to your smartphone wirelessly.

128 GB SD Card Capacity

For greater image storage.

TECHNOLOGY DRIVEN™

Dual Channel recording to keep you safe on the road.

WIFI & GPS

The inbuilt WIFI can give your smartphone access to change settings of your dash camera via the DSH-922 app. You can also share the footage directly from your Smart Phone on Social Media.

The inbuilt GPS records your footage with GPS coordinates and speed watermarks. GPS coordinates will cover you while you complete travel.

Sound Alerts

Will help you navigate important functions like Start Recording, Stop Recording, WIFI ON and WIFI OFF.

Rear Camera Recording

Rear camera can be rotated 360° will allow you to align the camera perfectly with your car rear window. It records in Full HD 1080P @ 30 FPS to give you a clear picture to read license plates of cars behind you.

Visual Alerts

The DSH-922 has smart Dual LED light signal when recording it would light up Green and when it's not recording will light up Red light.

DSH-922 has been engineered so the light is on the passenger side to avoid distraction to driver.
