- 8. This is the Record List Interface. Each file name is structured as Year/Month/Day/Time.
- 9. Eg: 20180705154012_NM.avi = 2018, July, 5th, 15:40 12 secs.
- 10. Select the files, you need and then select Export.
- 11. Please be aware that not all files will be shown on the one page, you will need scroll through the pages to find the correct time. Using the arrow buttons on the right of the screen as referenced below:

- 12. An export screen will pop and please select USB.
- 13. It will start to export the files onto the selected USB, until a final pop up will say Notice, "Video Files exported successfully".
- 14. If you don't get this notice, please repeat steps 5 12
- 15. Remove USB and verify your files are correct
- 16. Close and lock the hatch located at the front panel. Do not record unless the DVR front panel is locked.
