PRODUCT DESCRIPTION

Portable DVR drive recording system with 2" screen

NARRATIVE

The **DVR-6330** is a windscreen mounted DVR drive recording system designed for driver blame protection. The inbuilt camera will record video & audio footage showing road, weather & traffic conditions onto the removable memory. The system supports up to 32GB microSDHC cards for up to 48hrs of footage that can be played back on any PC or copied, stored or emailed for future reference in 15 min blocks. The system simply powers off any 12 or 24v cigarette lighter and is easy & simple to use.
