

ESCORT®

SPECIFICATION SHEET

MAX 360®

360° Radar/Laser Detector with Alert-Signaling Arrows

360° Directional Alert Arrows

Dual-antenna detection rapidly scans surrounding threats. Experience ultimate intelligence by instantly knowing the direction of the source.

360° Directional Alert Arrows

Dual-antenna detection rapidly scans surrounding threats.

AutoLearn Technology

GPS location-based technology identifies and locks out false alerts as you drive

Extreme Range

Extreme range and all out performance for the ultimate driving experience

Defender™ Database

Real-time resource to alert drivers to speed cameras, red-light cameras, speed traps and other risks

ESCORT Live

ESCORT Live App leverages crowd-sourced alerts and ticket protection

Unmatched Detection

The Escort Max 360 front and rear antennas scan rapidly in all directions harnessing the lightning fast focus of Digital Signal Processing (DSP) to find threats faster and more accurately than any other detector.

Unmatched Precision

Escort combines three driving modes plus speed based sensitivity, Cruise Alert and seamless connectivity via Bluetooth to its Escort Live app to only alert to real threats. Patented AutoLearn employs GPS technology to actually learn your route and automatically eliminate false alerts unique to your daily drive. Escort's proprietary IVT Filter™ minimises false alerts from moving In-Vehicle Technology sources such as collision avoidance systems.

Rich Data plus the Power of Community

Escort Max 360 protects drivers beyond conventional radar and laser threats by pre-loading our Defender Database of thousands of redlight and speed camera locations in Australia and New Zealand. And because Escort Max 360 comes Bluetooth equipped, it connects seamlessly to our award-winning Escort Live speed trap app, providing additional protection against mobile speed cameras and police locations reported by other drivers in the area.

Simple Communication

Escort Max 360 makes locating and identifying threats easy. Directional arrows display the location of threats while a high-resolution colour graphic display shows the type, strength and quality of signals plus real-time speed limit data (when connected to Escort Live) that shows your speed relative to the speed limit. Clear voice alerts keep you focused on the road.

The Total Package

Escort Max 360 comes complete with everything you need: a unique SmartCord with built-in alert lamp and mute button, our best quick-release magnetic StickyCup mount and a travel case.

Features

Benefits

UNMATCHED DETECTION – 360 degrees of longest range and lightening fast response	
Protection in all directions	Front and rear antennas scan completely around your vehicle and pinpoint signal location.
Fastest Response	DSP technology finds threats faster and more accurately
UNMATCHED PRECISION - Five levels of filtering for truest alerts	
Pinpoint Accuracy - GPS-based	AutoLearn uses GPS technology to learn your route and eliminate falsing.
Standard Filtering	Highway, Auto and Auto No X modes filter out common false alerts.
Intelligent Filtering	AutoSensitivity reduces false signals by varying sensitivity with vehicle speed.
Custom Filtering	Cruise Alert Filtering minimizes alerts below user-specified speed.
IVT Filtering	Minimises false alerts from moving In-Vehicle Technology sources such as collision avoidance systems.
App-based filtering	Filtering available when connected to Escort Live changes alert tones below user-specified speed using area speed limit data.
RICH DATA – Definitive speed trap information via the driving community and our proprietary database	
Crowd Sourced Alerts	Bluetooth-equipped to connect to Escort Live app for real-time community-based speed trap notifications.
Defender Database	Preloaded with thousands of speed camera locations that are updated in real-time via the Escort Live speed trap app.
Web Ready	Easily update your detector with new speed trap locations via built-in USB.
SIMPLE COMMUNICATION – Responsive alerts for effortless location and identification of threats	
Directional Arrows	Intuitively display location of threat relative to your vehicle.
Customizable High Resolution Multi-Colour Graphic Display	Clearly displays signal type, strength and quantity and even compares your speed to speed limit when connected to Escort Live.
Voice Alerts	Clear voice alerts promote focused driving.
Dual-Language	Choose English or Spanish text and voice alerts.
FULLY EQUIPPED – A complete package for the ultimate plug-and-play experience	
Premium SmartCord	Includes convenient power LED, Alert LED and Mute button.
Magnetic StickyCup mount	Our best heavy-duty windshield mount provides easy mounting and secure hold.
Premium Travel Case	Convenient case is perfect for storing and carrying Escort Max 360.
Quick Reference Guide	Includes simple steps for use right out of the box plus instructions for custom settings and software updates.
