

Platinum Series NextG Tracking Device

The Platinum NextG offers accurate and reliable live tracking and a vast array of optional extras, all on the same easy to use, comprehensive web based tracking platform. You only pay for the features you need, plus the freedom to add or remove features and options as your business needs change. Optional Garmin screens can be added to provide 2-way base and driver communication. Additional features and options include live online canbus providing real time engine reporting; man down rescue and alarm beacon with 1km range from vehicle; crash and harsh braking sensor for driver safety and dangerous driving reports.
