

PRODUCT CODE: Laser Tester

BARCODE: 9332820007015

DESCRIPTION: Multi Laser Tester for Laser Detectors/Shifters

A Laser Speed Gun can cost anywhere from \$3000. This is not an option for most. For a fraction of the cost, this small handheld Laser Tester is like having all of those Laser Guns in one unit.

A must have for installers and retailers alike. How many times have you had a customer return a detector saying “it’s not picking up laser”, only to find it was a placement issue or user error? Now you can test the unit straight away. No need to waste time returning the detector to the supplier only to be told, “No fault found”. Test the proper functioning of Laser Detectors, installation/positioning problems or fault finding.

Operates on all known laser pulse rates that are currently used throughout Australia and New Zealand including Poliscan, TruSpeed and TruCam.
Requires 2x AAA batteries (not supplied)

LASER PULSE RATES – PPS – Pulses Per Second:

Ultralyte LTI 20/20	100 PPS
Ultralyte LTI 100LR	125 PPS
Kustom Pro III	200 PPS
Stalker LZ1	130 PPS
Riegl	160 PPS
Atlanta	238 PPS
Laveg	600 PPS
Other Laser	305 PPS

DATE OF RELEASE: October 2014
