

All 4 cameras

Rear and Blind Spot cameras

PRODUCT CODE: NFVS-4DVR

BARCODE:

PRODUCT DESCRIPTION: Blind Spot/Full Vision System w/ 4 Cameras & DVR

NARRATIVE

The NFVS-4DVR utilizes 4 wide angle cameras mounted front, rear, left and right and switches between them automatically and displayed on screen when the corresponding triggers are activated ie. rear-view when in reverse, left & right blind spot view when triggered by your indicator. The NFVS-4DVR has a built-in drive recorder, a must-have for insurance and litigation protection. The system also has a vibration sensor which will activate the DVR if the vehicle is bumped/hit when parked. All recorded to a removable SD card (up to 32Gb).
