

9" Quad View Touch Screen Monitor with Integrated 4 Channel Full HD Driver Recorder

NSM-90AHDDVR

The NSM-90AHDDVR is a quality 9" quad monitor with integrated four channel drive recorder that records in 1080p Full HD on all channels, all operated via a responsive touch screen and the easy to use operating software. It can connect up to four cameras to record real time video to up to four Micro SD cards up to 128GB each [cards not included] and GPS for vehicle route and speed logging.

As a critical driving aid, the monitor can display side/blind spot cameras in full screen when triggered by the vehicles indicators and rear reverse camera switches to full screen when in reverse, all whilst continuously recording all four cameras uninterrupted.

The NSM-90AHDDVR is compatible with AHD cameras up to 1080p and is backwards compatible with standard CVBS cameras [adapter cable required for CVBS cameras].
