

## 4G/GPS Trailer and Asset Tracker - 3 Year Battery Life

The FM TT4G is a high performance and reliable 4G/GPS Trailer Tracking device which has been designed for trailers or asset GPS location and theft recovery. The FM TT4G can be configured to report location daily while still providing battery life of up to 3 years.

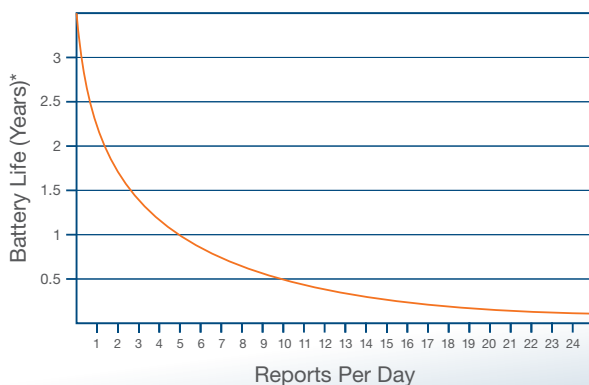

The FM TT4G has a built in GPS antenna and no external wires. The optimal design and IPX7 rating provides protection against temperature, dust and water. The FM TT4G is ideal for non-powered assets or any asset requiring minimal battery usage. Its small size allows it to be used on procurement stock.

### Features

- 4G data communication for live tracking
- Up to 3 year battery life w/ 1 log per/day or 1 year w/ 4 logs per/day (replaceable CR123)
- Magnetic base option, or flange mount
- Utilises motion sensors and comparative GPS positioning (custom configured)
- Tracking modes:
  - Time interval mode
  - Distance interval mode
  - Idle tracking mode
  - Low battery level mode
- Reports:
  - Mileage report
  - Battery level report
- Alarms:
  - Power low/internal battery alarm
- Journey logging up to 100,000+ waypoints
- Geo-fencing control
- Customised firmware available (on application)
- Free Apple and Android fleet management app
- Can be re-configured over-the-air to change reporting intervals

### Specifications

- IPX7 water and dust proof rating
- Wide temperature range (-40° to +70°)
- Built in 3 axis G-sensor
- CR123 6000mAh replaceable battery
- Data buffer with 8000 positions
- Internal cellular antenna allowing multiple mounting positions
- Internal GPS antenna
- Size: 100mm x 55mm x 32mm
- Weight: 260g

\*Battery life is an estimation only and depends on operating environment such as GPS signal, 3G coverage or temperature.
