PRODUCT CODE: FMA-eCD   **BARCODE: 9332820005660**

RFID Card and Antenna

How often do you get a query about a delivery and then spend a great deal of time trying to figure out what driver it was assigned to. Or who is responsible for that speeding or parking fine?

Radio-frequency identification (RFID) technology integrated with Fleetminder GPS tracking device can give you that information and allow you to control the use of the vehicle.

RFID prevents unauthorised drivers from driving your truck or other company vehicle. The engine will only start if the RFID system identifies the driver.

This protects your drivers and assets as drivers are much less likely to speed or drive recklessly if they know their driving assignments are being tracked and monitored. RFID will help to reduce abuse and bad driving habits to protect your staff and assets.

- Identify which Driver was driving which vehicle, where and when.
- Allows only authorised drivers to start the vehicle.
- Can be configured so that Vehicles can only be started with authorised RFID Card.
- Allows driver behaviour to be analysed.
- Allocate vehicles and routes to authorised drivers.
- 6 months of history online at any time.
- Multiple drivers can be authorised for different vehicles.

Fleetminder RFID driver identification systems matched with a good Fleetminder GPS tracking device is a great feature for protecting your vehicles, drivers, maintaining your fleet and making it easier to support your customers. Contact sales@fleetminder.com.au
